Quick Start Guide

Widget—Full Control

Smart Ring PRO includes a Profile Picker Widget which allows you to quickly switch profiles and shows remaining time for temporary mode.

To add the widget tap-and-hold on an empty area of the Home Screen and select **Widgets-Smart Ring PRO**.

Now you can easily switch your phone to Loud, Quiet, Vibrate, Silent or enable the Call Blocking features with your finger tips.

Easily set your phone to for example Loud for 15 minutes or Silent for 2 hours

Call Filter— Full Privacy

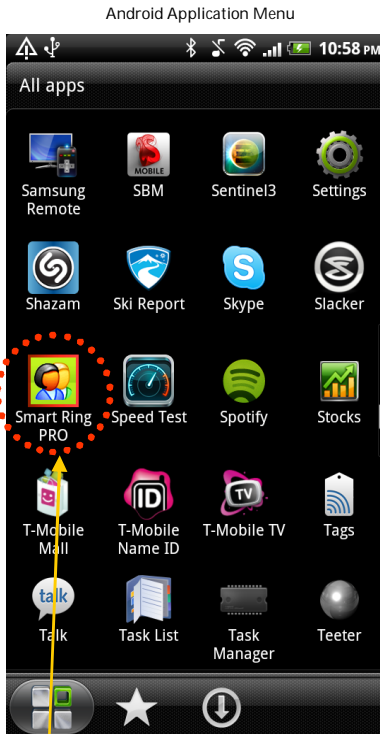

With Automatic Profiles and Call Blocking, Smart Ring PRO adds real intelligence to your phone.

Use the **Profile Manager** to customize call filtering per contact and manage sound-only profiles.

Use the **Scheduler** to set up Automatic profiles that automatically manage your phone's sounds and call blocking.

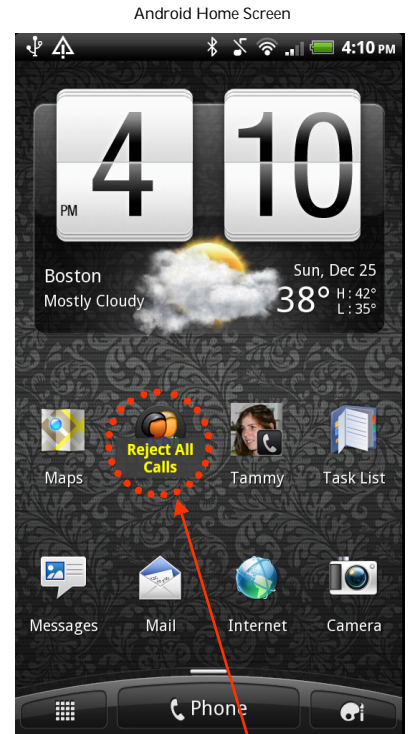

You can now easily set your phone to (for example):

- Automatically Reject all callers except your family members at night
- Automatically switch to Vibrate or Silent during a meeting and/or allow only certain callers when you are in certain meetings
- Automatically hang-up or reject unwanted callers

Program Icon

Tap to open **Launcher** to select profiles, manage profiles and automatic profiles.

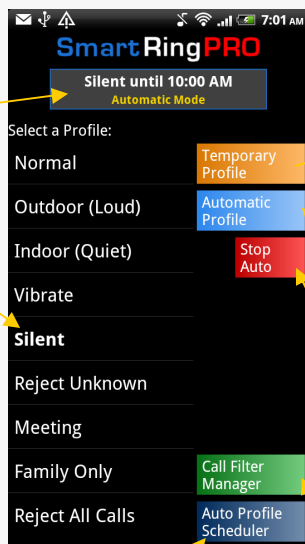

Profile Picker Widget icon shows the currently active profile and remaining time during temporary mode.

Tap once to open the **Launcher** to switch profiles.

Launcher—Profile Picker

Welcome to Smart Ring PRO!

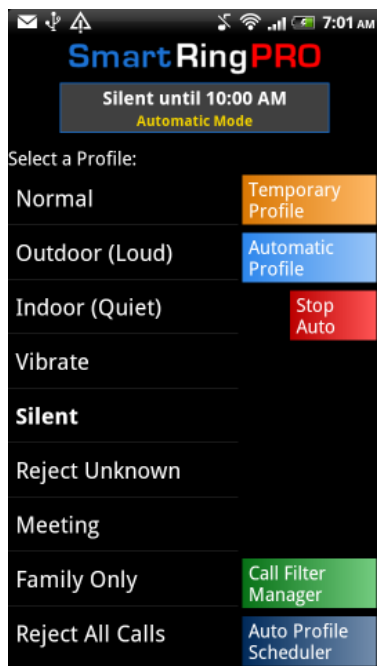

Adapt your phone to your busy schedule and empower your mobile experience! Integrating Advanced Automatic, Scheduled and Temporary Profiles and Call Blocking with an easy to use user interface.

Automatic Profiles

Advanced Call Blocking, Ring/Sound Profiles

Advanced Profiles—Advanced, Automatic and Temporary profiles easily accessible from the Android Home Screen.

Installing Smart Ring PRO onto your phone

If you purchased the program directly from the **Android Market** on your phone, the software will be installed automatically. If you purchased it from our website please follow the instructions below.

Important:

Please make sure that Smart Ring PRO is not being terminated if you use a task manager on your phone.

» Manual Installation Instructions for Windows 7/Vista/XP/2000/NT users:

1. **Un-install the demo/free version if it's installed** (see instructions below).
2. **Soft-reset the phone** (important). Press and hold the power button to turn the phone off. Then turn it back on and wait for the device to boot up.
3. **Go to Settings>Applications** and check the "Unknown Sources" checkbox.
4. **Connect your phone to your computer** and Enable USB mass storage on your phone.
5. **Copy the .apk installation package file to your phone's SD card.**
6. **Run the installer** - open a File Manager on the phone and run the .apk file to install the program. If you don't have a file manager installed, download a free one from the Android Market (eg. File Manager by Adao Team).
7. **Add the Smart Ring PRO Widget to your Home Screen** so you can easily switch profiles. Tap-and-hold on an empty area on your home screen, select **Widgets** and select Smart Ring PRO.
8. Smart Ring PRO will start automatically after installation.

Congratulations! You can now open Smart Ring PRO by tapping on the Smart Ring PRO icon in your application menu. Make sure to add the widget to your home screen to take full advantage of the program.

Note: Smart Ring PRO runs in the background to manage phone Sounds, Profiles and Call Filtering.

Widget/Profile Picker Icon operation:

- Tap once to select a Profile
- Currently active profile is shown under the icon

Important: Smart Ring PRO adds Advanced/Call Filtering profiles to your phone.

Advanced Profiles control ring volume, ring type and system volume on the phone.

Select profiles on the Home Screen by tapping on the Profile Picker Button.

To customize profiles go to the Application Menu and select "Profiles".

Un-installing the demo or full version of Smart Ring PRO

To un-install either the demo or a full version go to **Settings>Applications>Manage Applications**, select the program from the list and tap on the Uninstall button. Follow up with a soft-reset of the device.

Smart Ring PRO Feature Overview

QUICKLY CONTROL RING VOLUME and CALL BLOCKING. Enabling Advanced, Automatic and Temporary Profiles, includes Profile Picker Widget.

With a tap of your finger, easily switch your phone to Loud, Quiet, Silent, Vibrate and enable Call Blocking profiles such as Family Only, Reject All, Reject Unknown or one of your own profiles. Quickly enable Temporary Profiles such as "Silent for 2 hours" when in the movie theater, "Meeting for 30 minutes", etc.

ADVANCED CALL FILTER and SOUND PROFILES

Easily specify who can call you and whether the phone rings or is silent when they call. Fully customizable Phone Profiles let the user group and personalize Call Filtering, Ring Volume, Ring Type and System Sound settings based on a contact or as a global assignment.

AUTOMATIC PROFILE SCHEDULER

Make your phone adapt to your work and life. Take full control of the phone by easily creating a schedule that automatically changes phone sounds and enables call blocking based on hours of day and days of week. Your phone can now be automatically silent at night allowing only family members to call, quiet when you're in the office, and loud when you're commuting.

ADVANCED CALL BLOCKING

Complete Privacy - Automatically block unwanted callers including Unknown and Private numbers. Fully integrated Call Filter allows you to specify the following settings to incoming calls per contact or as a global setting:

- Reject: The call is automatically rejected and the caller is sent to Voicemail
- Silent: The call is permitted to come through but the ring is silent
- Vibrate: The call is permitted to come through with vibrate
- Bypass: The call is allowed to bypass the call filter in case of a global setting

TIMED TEMPORARY PROFILES

Easily switch to a certain profile temporarily (silent for 2 hours when in a cinema for example), automatically switching back after the time passes.

Full integration with the Android contact database allows you to use phone and Gmail contacts.

COMPATIBILITY

This version of Smart Ring PRO is compatible with all Android devices running O/S version 2.0, 2.1, 2.3., 4.0.x or higher.

Advanced Profiles—Overview

Smart Ring PRO enhances your mobile experience with advanced phone profiles that combine phone Sound Settings (for Ringtone volume/type, Notification volume and system volume) with Call Filtering. They can be enabled or disabled and are used standalone or as a basis for automatic or temporary profiles.

The program includes a pre-defined set of profiles that are fully customizable by the user.

Running Profiles

Advanced profiles are enabled by default and can be run manually, Automatically or in Temporary mode. Advanced profiles enhance the standard built-in phone profiles (if available on the phone).

Switching Profiles

Profiles are switched by selecting them from the phone's Home Screen (using the Profile Picker Widget).

Customizing Profiles

*To customize profiles, open the Profile Manager by opening **Profile Manager** from the applications menu.*

Renaming Profiles

To change the name of a profile, open the Profile Manager, then press Menu>Rename and enter a new name.

Automatic Profiles

Automatic profiles use Advanced Profiles and change them automatically based on a timed schedule.

*To specify a schedule and create a new automatic profile, use the Automatic Profile Manager/Scheduler by tapping on **Scheduler** in the applications menu.*

See the Automatic Profile section for more information about creating automatic profiles.

Temporary Profiles

Temporary profiles are very useful when you need to quickly set your phone in a specific state for a limited period of time. See the Temporary profile section for more information.

Important Note about Call Filtering and Profiles:

If Profiles are enabled in Smart Ring PRO, the active Profile settings will override all ring type, volume and system volume settings on the phone if so configured.

Tip: Profiles are selectable by tapping on the Profile Picker icon on your Home Screen.

Pre-defined regular Profiles

Normal—this profile will set the phone to medium volume.

Silent—this profile sets all incoming calls/SMS to silent.

Vibrate—this profile sets all calls/SMS to vibrate.

Loud—this profile sets volume for all calls/SMS to Loud and Vibrate, suitable for outdoor use

Quiet—this profile sets the volume to 1, suitable for indoor use.

Meeting—this profile is by default set to Vibrate for all calls and is fully customizable to allow or disallow certain callers.

Family Only—this profile can be customized by the user to reject all calls except Family members. To use this profile, assign the "Family" category to your family contacts, then inside the Profile Manager, set REJECT for DEFAULT and BYPASS for the Family category.

Reject All Calls—this profile is set to reject all incoming calls (and forward to voicemail if available).

Reject Unknown—this profile will reject only unknown and private callers.

Pre-defined Automatic Profiles

Silent Sleep—this profile is set to only allow your Family members to call during night hours. The rest of the time the phone will run the Normal profile.

Auto Meeting—this profile is set to track your calendar and apply the Vibrate profile when it detects a meeting has started.

Sample WorkWeek—this profile shows an example of a full daily schedule.

You can easily customize the above profiles to suit your needs. You can also create your own new profiles.

Advanced Profiles with Call Filtering

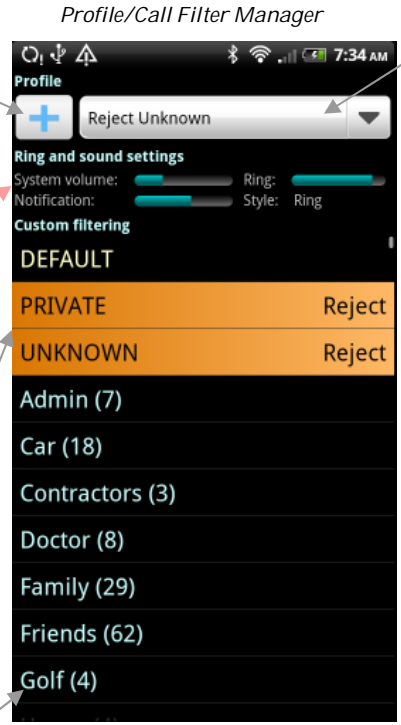

Profiles combine phone Sound settings and Call Blocking/Filtering that can be applied to contacts, categories and private and unknown numbers. To open the Profile/Call Filter Manager, open Smart Ring Pro and select **Call Filter/Profile Manager**.

Favorite—Tap here to add this profile to the list of temporary profiles in Widget.

Profile Sound Settings
Shows volume settings and ring type for this profile.
This applies to all callers that do not have individual assignments.
Tap to in this area to set Default Sound Settings

Global Filters

Individual Contacts and Categories—tap to specify call filter/sound settings per contact.

Profile Name—tap to select a different profile

Common Actions

- >> To switch to a different profile tap on the pull-down arrow next to the Active profile's name.
- >> To change the Default ring volume and type for the profile, tap the progress bars.
- >> To change the name of the profile, press **Menu>Rename Profile**.
- >> To clear all settings inside a profile, press **Menu>Clear Profile**.
- >> To Add a new profile press **Menu>New Profile**

Call Filter Settings

Call Filter settings can be applied to individual contacts or as global filters.

REJECT: The call is automatically rejected and the caller is sent to Voicemail

SILENT: The call is permitted to come through but the ring is silent

VIBRATE: The phone vibrates

RING: The phone rings using Profile's default ring volume/type

RING+VIBRATE: The phone vibrates and rings

BYPASS: The call is allowed to bypass the call filter in case of a DEFAULT setting (no icon shown)

Note: Call Filter settings applied to Individual Contacts or Global filters supersede profile's Default Sound Settings.

Ring and Sound Settings

Default Sound Settings apply to all calls that are not filtered by individual or global filters.

RING VOLUME: Variable (Silent to Loud)

RING TYPE: Ring, Vibrate, Vibrate and Ring

Global Filters

DEFAULT: Assigning a setting to default will apply the filter to all contacts without an individual assignment.

PRIVATE: Applies the call filter to private numbers (numbers without incoming Caller ID information)

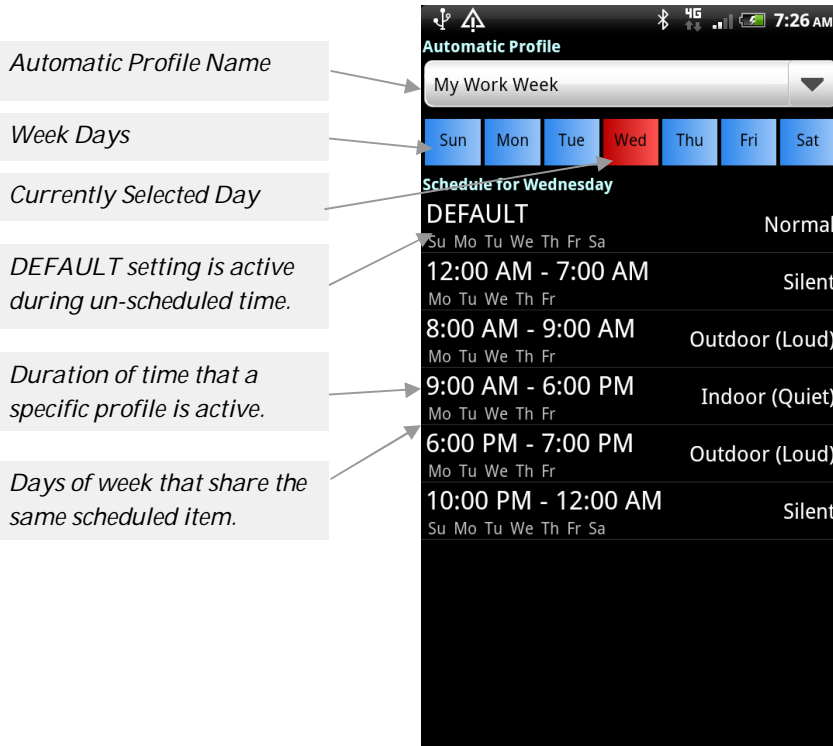

UNKNOWN: Applies the call filter to contacts not in your contact list.

Note: Global assignments supersede Sound Settings.

Automatic Profile Manager and Scheduler

Automatic Profiles allow you to take full control of your phone and incoming calls by automatically switching profiles based on your schedule (based on hours, days of week).

The Automatic Profile Scheduler/Manager makes it easy to specify a schedule that Smart Ring PRO will follow. To open it, open Smart Ring PRO **and tap on Automatic Profile Scheduler.**

Automatic Profile Name

Week Days

Currently Selected Day

DEFAULT setting is active during un-scheduled time.

Duration of time that a specific profile is active.

Days of week that share the same scheduled item.

Common Actions

The program includes a pre-defined set of automatic profiles that are fully customizable by the user. You can also add your own profiles.

>> To switch to a different profile tap on the pull-down arrow next to the profile's name.

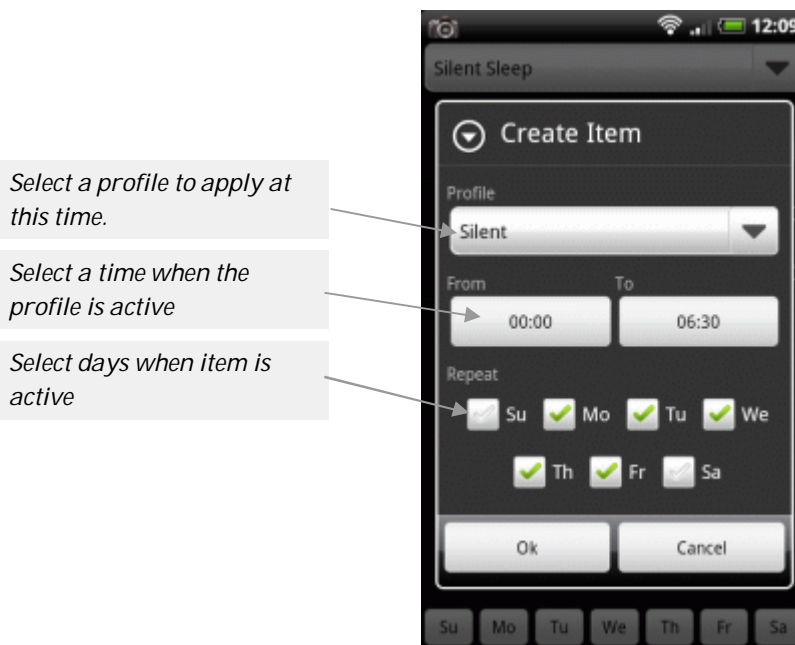

>> To add a new scheduled profile change press **Menu>New Item**.

>> To change the name of the selected profile, press **Menu>Rename Auto Profile**.

>> To assign a profile to the DEFAULT setting (used when no other profile is active) tap on DEFAULT and select the profile.

>> To clear all settings inside a profile, tap **Menu>Clear Auto Profile**.

>> To add a new automatic profile press **Menu>New Auto Profile**.

Select a profile to apply at this time.

Select a time when the profile is active

Select days when item is active

Adding/Editing a profile change

Temporary Profiles

Temporary Profiles (Temp Profiles) are very useful when you need to quickly set your phone in a specific state for a limited period of time.

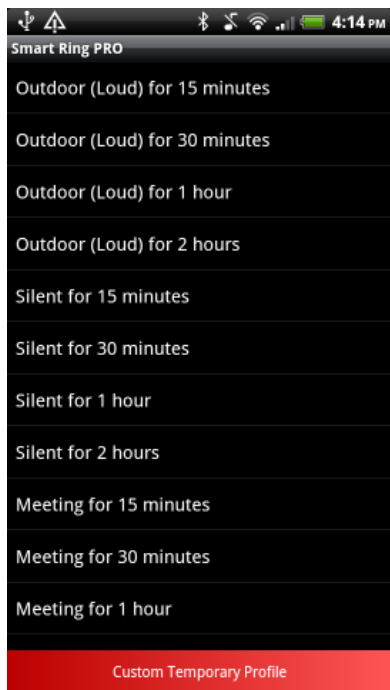

Any profile can be set to Temporary mode—in this mode, the profile will be active for a specified amount of time (example, for 2 hours). When the time expires Smart Ring PRO will switch back to the profile/mode that was active before temporary profiles were activated.

Examples of Temporary profile use:

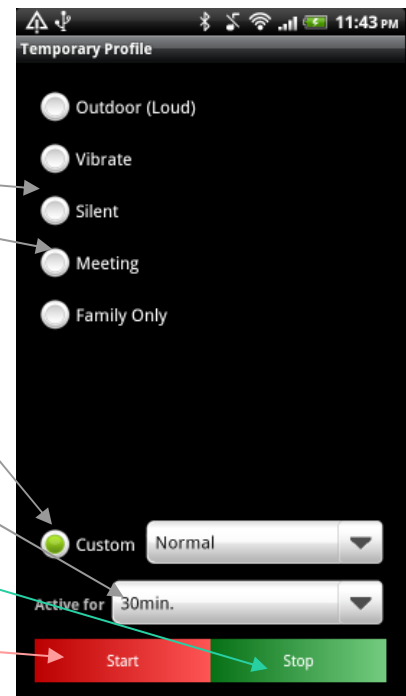

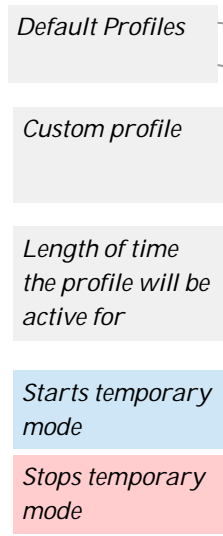

- You're going to a movie theater and want the phone to be silent for 2 hours and then automatically switch back to loud after the movie is over
- You're at a party and want the phone to be extremely loud for 3 hours and use the loudest ringtone that you have
- You're in a non scheduled meeting and wish to silence your phone for 1 hour

Enabling a Temporary profile

Enable a temporary profile by tapping on the **Profile Picker Widget icon on your Home Screen** and then tap on the **Temporary** button. This enables you to select from a variety of pre-defined temporary profiles. If you wish to specify a completely custom temporary profile tap on the **Advanced** button. This will open the Temporary Profile Window shown below. **TIP:** To stop a temporary profile, simply select a regular profile from the Widget's profile list.

Temporary profile list (Widget)

Specifying a custom temporary profile

NOTE: To add your own profile to the list of temporary profiles, add it as a Favorite by tapping on the STAR button next to the profile name in the Profile Manager.

Custom Temporary Profile Window
 This window allows you to customize the temporary profile and the time the profile will be active for.
NOTE: When temporary profiles are active automatic profiles are disabled until the time expires.
